Java

Python

Frontend

PROFILE

Hello everyone my name is Aadesh Khamkar, I am pursuing a BE (Artificial Intelligence and Data Science) from DYPIEMR AKURDI PUNE.Now my internship as a business research specialist in younity.in is completed. I love to implement new things and do something innovative. While studying this we are taught Python and C++ in the syllabus but I was interested in learning something unique so I took up Java+DSA and along with that I am doing web development. I am currently seeking roles where I can utilize my experience and skills.
